

GMC Environmental Consulting (and project works company **Shingleback Environmental Project Services**) is proud to be now undertaking the maintenance and replanting requirements on the Pacific Highway between Tyndale and Ewingsdale (T2E) for Transport for NSW.

GMC has completed a number of land remediation projects and is now undertaking the landscape maintenance requirements for T2E as well as the Pimlico to Glenugie sections of the new W2B Pacific Highway.

Guy Corbett, **GMC's** director who has been actively involved in the Works comments:

"**GMC** has a long and proud work history in regard to highway upgrade landscape project works and now appreciates being asked to undertake the landscape maintenance and restoration works for over 150kms of the Pacific Highway.

Across all the completed works on the highway project, **GMC** has gained a reputation for innovation and quality excellence by undertaking all works with the established aim to deliver high quality mature landscapes.

GMC is an environmental consultancy firm, offering revegetation services across Australia. We specialise in the design, procurement, delivery, maintenance and management of landscaping, and rehabilitation works.

GMC is at the forefront in the use of consistent approaches to land remediation and landscape works. We provide innovative and sustainable solutions for environmental projects, helping to improve efficiency and client outcomes across all works.

In partnering with our clients, we deliver excellence across the life of a project, regardless of size, complexity or location.

Our Services Include:

- Environmental consulting/planning
- Broad acre revegetation projects
- Civil landscaping construction
- Civil infrastructure projects
- Road construction landscaping
- Integrated project management
- Revegetation planting including tube stock planting
- Erosion control assessment & installation services
- Landscape maintenance
- Hand sowing
